RECLAIMING THE DESERT.

The discoveries made in Salt river valley by the Hemenway Expedition, under the direction of Prof. Frank Cushing, have been productive of good in revealing how great was the prosperity Bodeker. of that favored region under the Toltecs, showing the possibilities of agricultural pursuits in the broad river valleys of Southern and Central Arizona under a wise system of irrigation, drawing the attention of capitalists to our Territory as an inviting field for investment, and stimulating endeavor to reclaim the immense areas of land which an uncivilized and less favored race than our own, hundreds and hundreds of years ago, made to yield

bountiful harvests. From the valleys of the Gila and Salt comes news of the great activity in that er or less magnitude are being actively prosecuted, and capital is being invested with the confident belief that these projects will prove successful and pay handlabor to the development of Arizona's returned. agricultur d resources.

Irrigation is as yet not fully understood or appreciated in the United States. From what has been accomplished in California in conver ing the trackless desert into blooming gardens and orchards, we can form some conception of what it is possible to do in reclaiming the almost boundless areas of land in the the Great West that now lie barren and unavailable to the husbandmen. Great results have, however, already been attained in this country by imigation. A recent report sent out by the Department of Agricul are compates the total length of irrigating canals in the United States at 15 000 miles, an I the lands thus made productive now support several midion inhabitants. About me-third of all our country lacks a natural and distributed water supply adequate to the need of cultivation, but only a very small part of this land is irreclaimable, and in time most of it will be made to support large and thrifty populations.

The French, in reclaiming large areas of the desert of Sahara, furnish an example of what can be accomplished through irrigation. Certainly no here in the world is there a more unpromising field for such enterprise, and yet they have planted many flourishing oasis, suppor ing prosperous communities on that waste of sand, and are gradually but surely overcoming the seeming insurmountable difficulties of subjugating the

There is every reason for encouragement to those engaged in this laudable undertaking in Arizona, and we believe that within a few years Southern and Central Arizona will rival in beauty and agricultural productiveness the most favored portions of California. -Globe Silver

THE COPPER SYNDICATE

It is stated that all the copper being bought in this country is being rapidly shipped to France. They evdently want to transfer the rule of the copper market from Englard to France, and have very good good show of doing so. This French syndicate is said to have about \$250,000, 000 to back up their project. The famous Tharsis copper mine has agreed to sell to the copper ring all the copper it produces, at £65 per ton, and the ring undertakes to refund to the company halt of the profits of all they may sell at above that price. It is now stated, also, that this same syndicate has obtained the control of the output of the Calumet and Hecla copper mine, Like Superior. The syndicate has also absorbed the Rio Tinto cop per mine in Spain and the control of all the Chile bars, so they have the copper of the world under their control. The prices paid by the syndicate are not ruling prices The Butte mines in M ntana get II cents for their yield for the next two years, it is understood, while the Lake Superior mines get 13 cents. The syndicate is not selling, but is shipping every ounce across the water.

The subject of this syndicate has come up in the Chamber of Deputies in Paris. It has been urged that the object is to oppose small manufactures. The sup percers of the ring contend that the result of the combination will be the transfer of the copper market from London to Paris, and claim that its formation has already increased the public fortune in France to the extent of 100,000,000

A: all events the rise in price of copper resulting from the operations of the syndicate has had the off ct of starting up many mines on this coast. In this state the old Copperopolis mines are being opened. In Nevada several copper properties are being ex mined with a view to re-work them. In Anzona a number of mines which have been closed down have again started up. It is now stated that the Unit d. Verde copper mines, 30 mies fro Pre co , have been soid to M. Ciars of Bu te, M. L. The property has been ide for some time owing to he excessive control tran partation of coke and of shipping builton. The recent rise in copp r has a suited its owie's that both more and mill can be run successfully The price, and is no stat d, but it is considered a handsome som, as the former owners held it at \$3,500,000 before the rise in copp r. The mining outlook for A zona is mo t fi ttering, hardly a day passing but a me sale of mining property

is consummared. A call ad of mac iners for a smelting firmee has grived at Golconda Nev., for R uleston & Bates, who own large copper mines about 12 miles south of tha station. There is or enough in sight to run the smelter for months -Mining and Scientific Press.

HUACHUCA STATION, Feb. 21, 1888. Editor Star:- News of a highway robbery near Elgin station on the Babacom ari, was brought here to-day by Louis

On Sunday night a party of men under he lead of Eduardo Lopez. held up a Mexican near Elgin. They ordered him to dismount, which he did, and one of the robbers then mounted and role off with the horse and saddle of the

Lopez is a hard character, having heretofore got away with horse stock under circumstances which would warrant his conviction and im risonment, as

On September 4th or 5th of last year, Lopez came to the ranch of Louis Bodirection. Irrigating enterprises of great- deker, and claimed that he had a man under arrest near by, that he wanted to borrow from Mr Bodeker an extra horse to take the criminal before an officer in Cochise county. Mr. Bodeker loan some returns to those who have had suf- ed his own private saddle horse to ficient faith to give of their wealth and Lopez, which Lopez rode off and never

Lopez has a brother living in Froneras, and his mother I ves in Bisbee. Eduardo Lopez is a good locking Mexican with a black moustache. In the interest of good government it is hoped that he may be arrested and convicted for some of his foul offenses.

THROUGH THE POREST.

The Old and Young Danced All Night Our Hardy Ancestors,

Old men live in the past.

Perhaps it would be better for the young men of the present, if they lived a little bit more in the past, and drew

less on the future.

The log cabins of primitive times would seem very cheerless habitations to the people who live in the finely constructed,

people who live in the finely constructed, furance heated mansions of to-day. But our grandparents took a great deal of comfort in these rude homes.

They were rugged and healthy. The men had stalwart and hardy frames, and the women were free from the modern ailments that make the sex of to-day practically helpless slaves to hired foreign help.

eign help.
White-haired grand-sires frequently took their life partners and on horseback rode a score of miles through the forests to enjoy the lively pleasures of a frontier ball, danced till daylight, rode home again in the early morning, then put in a good day's work.

Middle-aged folks of to-day couldn't

stand that sort of a racket.

To these mud-chinked log cabins doctors' visits were a rarity. The inhabitants lived to a rugged and green old

habitants lived to a rugged and green old age.

Sometimes these log cabin old-timers were taken ill. They were not proof against all the exposures to which they were subjected. They found the effective remedies for these common ailments in the roots and herbs which grew in the neighboring forests and fields. They had learned that nature has a cure for every ill. These potent remedies assisted their sturdy frames to quickly throw off disease and lett no poison in the system.

The unpleasant feature of modern practice with mineral medicines is the practice with mineral medicines is the injurious after effec on the system. May not modern physical degeneracy be due to this feature?

A drug-saturated system is not in a natural, consequently not in a healthy,

inevitable result.

There can be no question that remedies

from the laboratory of nature are the best. If they are as efficacious, they have the advantage of leaving no after Their efficacy, if properly compounded, and the proper remedy applied to the proper disease, will not be doubted. The

experience of ages proves it. Their disuse has come about principally through the rapid congregation of people in cities and villages, rendering these natural remedies difficult to obtain. Progressive business enterprise has lately led to putting these old time remed es within reach of all classes.

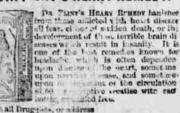

The proprietors of Warner's safe remedies, in the faith that the people of to-day would be benefited by using the simple remedies of log cabin days, have Their disuse has come about principally

simple remedies of log cabin days, have caused investigations to be made and secured the formulas of a number of those which long and successful use had proved to be most valuable.

They will, we learn, be known under the general title of "Warner's Log Cabin Remedies." Among these medicines will be a "Sarsaparilla" for the blood and liver, "Log C. bin Hops and Buchu Remedy," for he stomach, etc., "Log Cabin Cough and Consumption Re-medy," a remedy called "Scalpine," for the hair, "Log Cabin Extract," for internal and external use, and an old valuable discovery for catarrh called "Log Cabin Rose Cream." Among the last is also a "Log Cabin Plaster" and a "Log Cabin Liver Pilt."
